Minerva Summer Institute Objectives

1	To facilitate the process of industry, government, associations and academia working together with the ultimate aim of improving safety, health, environment and loss management in the workplace.
2	To enable educators to acquire safety, health environment and loss management knowledge, including available resources and how to incorporate topics in their curricula
3	To enhance industry, government and associations' awareness of ways to effectively assist universities with respect to resources and support in the field of safety, health environment and loss management
4	To provide a vehicle by which the Canadian Society for Chemical Engineering Process Safety Management subject division and Minerva Canada can support universities on a continuous basis with respect to integration of topics into the undergraduate curriculum.
5	To encourage universities to commit to an implementation strategy on coverage of environment, health and safety topics into their teaching programs.
